SATURDAY, NOVEMBER 17, 1849.

Convention of Superintendents.

Pursuant to public notice by circulars addressed to the superintending School Committees of the several towns in the County of Penobscot in conformity to law, a convention for the choice of a member of the Board of Education for said County was holden in Bangor on the 14th day of Nov. 1849.

The Convention was called to order by David Worcester, Esq., member of the Board for the County. Hon E M Thurston of Corinth was elected Chairman, by Ballot, and, on nomination, John Benson, M, D. of Newport was appointed Secretary.

John E Godfrey, Esq. of Bangor, and G. L. Smith of Corinth, were chosen a committee on credentials, who subsequently reported that 30 delegates were in attendance, from 18 towns, as follows—

Bangor—A G Wakefield, Asa Walker, John E Godfrey, Spencer A Pratt.
Bradford—B F Atkinson.
Brewer—Nathan Dole, R. K. Cushing, J. R. Munsell.
Charlestown—Levi Bradley, E M Thurston, S W Foss.
Corinth—L. D. Ulmer, G. L. Smith, J. T. Wheeler.
Dexter—George Hamilton.
Eddington—E Cumins.
Enfield—E H Treat.
Exeter—S W Butters.
Glenburn—Elisha Gibbs, Nathan Parsons.
Hermon—James Patten, Jr, Harvey Harden.
Kirkland—Isaac Beale.
Levant—E F Crane,
Newburgh—Leonard Jackson.
Newport—John Benson.
Oldtown—Samuel Durborow.
Plymouth—Daniel Stone, Edward Smart.
Stetson—John Rogers.

Asa Walker of Bangor, Samuel Durborow of Oldtown, John Benson of Newport, and L. D. Ulmer of Corinth were chosen the business committee.

At the opening of the afternoon session, at the recommendation of the business committee, it was voted to ballot for a member of the Board for this county, at 3 o'clock.

The following resolutions reported by the business committee were then presented, and were discussed and adopted. Messrs Pratt, Wakefield, Crane, Godfrey, Bradley, Munsell, Durborow, Gibbs, Smith, Ulmer, Walker, and others, participated in the discussion, which was animated and kindly throughout.

Several resolutions proposed by the committee were rejected—one of which proposed to change the mode of electing the members of the Board by giving the election to the people of the several counties.

A 3 o'clock the convention proceeded to ballot for a candidate to be recommended to the Board of Education for elections as the member of the Board for this county, as less than half the towns were represented—no quorum. E F Crane, A G Wakefield and John Rogers, were a committee to receive sort and count the votes.

Having attended that duty they reported that David S True of Corinth had received 19 votes and was nominated, which report was accepted.

RESOLUTIONS.

1. Resolved, That the advancing state of education in this county, and the increased interest manifested by parents and teachers in our common schools, afford unmistakable evidence of the beneficent influence of the Board of Education, and of its fidelity to the purposes for which it was created; and that we are sure the voice of this county is nearly unanimous for sustaining it.

2. Resolved, That we regard Teachers' Institutes as one of the most efficient instrumentalities for securing a higher standard of qualification for teachers, and for elevating our public schools; that we believe important advantages would be secured by extending their terms, and placing them within the reach of every teacher in the State.

3. Resolved, That it be respectfully recommended to the Institute now in session in this city, to publish in their Catalogue, with the names of the teachers in attendance, the number of days each may have attended.

4. Resolved, That in our opinion, the interest of the great body of the people in the cause of education, and in the Board, would be greatly extended and increased by public lectures in the several towns by the Secretary of the Board, the member of the Board for the county, and other known friends and supporters of our schools; and that it be recommended to our superintending school committees of the several towns in this county to invite lecturers, or lecture themselves, in their several towns, and make all necessary arrangements for putting this resolution on a fair trial.

5. Resolved, That we concur with the late Secretary of the Board in the opinion expressed in his last annual report, that a more careful and thorough examination of those proposed as teachers in the several towns, would do much to secure a higher standard of qualification in the persons recommended, and save school districts from much imposition.

6. Resolved. That the best interests of our common schools demand a paper devoted to their advocacy and advancement, similar to the one suspended at the time of the resignation of the late Secretary of the Board.

7. Resolved, That we deem it advisable that school districts be as large in territory as practicable, and that the schools be graded wherever the State of the population will admit of it.

8. Resolved, That the heartfelt gratitude of every friend of popular education in this State is due to William G Crosby, Esq. late Secretary of the Board of Education, for his devoted, arduous and efficient labors while in that office; and that, we in our expression of that gratitude on behalf of Penobscot County, we mingle emotions of regret that he found it necessary to resign the office.

9. Resolved, That the printing and general distribution in the several towns of the annual reports of the Superintending School Committees of each, would have a favorable influence on the schools.

The following Resolution, offered by John E. Godfrey, Esq. was adopted:

Resolved, That the member of the Board of Education from this county be requested to institute an inquiry in the Board whether the establishment of County Agricultural schools will not be expedient in such counties as shall vote therefor, and to use his efforts to procure a plan, to be adopted by the body, to be presented at the next meeting of the Legislature for its action.

Voted. That the proceedings of the convention be published in the newspapers published in the city.

E. M. THURSTON, Chairman.
JOHN BENSON, Secretary.

Teachers' Institute—Penobscot Co.

THURSDAY—AFTERNOON.

Mr. Fowle, as previously noticed, or rather remarked, that he would tell Teachers how they could instruct scholars in writing. This lesson, therefore, was a very concise recital of the elements of Stenography. Possibly, the same ideas might have been obtained from a practical teacher of Penmanship. Learning to write is so common, although few are good writers, that this lesson was much in danger of being tedious. We adhere to the idea of printed copies to practice from. Also the black-board for small children.

Recess of 15 minutes.

Mr. Fowle gave a lesson in Arithmetic.—This was, in part a drill in Addition. The design of this lesson must have been deep laid, for it did not appear to us what important principle was illustrated, or fact brought out. It is to be hoped that the Institute while dieting on "anise" and "cumin" will be richly prepared for that more important dish "something."—Believing this remark to be true, we are not at liberty to tell *tall stories*.

The time alloted to the Session is short, fast gliding away; and, as yet, Reading, Geography, Grammar and History are untouched. Are the Teachers so inefficient as to cause so much delay?

THURSDAY—EVENING.

Lecture before the Institute by Mr. Fowle. Subject—The School System of New England as its founders understood it. The lecturer took a familiar view of the great principles on which the system is based, the manner in which it has been administered and handed down to our day; the improvements that have been introduced from time to time, and the further improvements required by the progress of knowledge and of society. He seemed to think that the times required greater efforts than had ever been made, and he dwelt with much earnestness upon the great want of moral and physical instruction to give a right direction to that intellectual education which has so exclusively occupied the attention of teachers from the beginning.

FRIDAY—MORNING.

After devotional exercises, Mr. Fowle submitted a few remarks touching the personal cleanliness of pupils. It was strongly hinted, that parents are too neglectful of the health and happiness of their children, by allowing them to attend school, dirty in person and apparel. Habits of youth will creep into after life, and the future health and happiness of the scholar demand reform in this particular. Again, a polite exterior and gentlemanly bearing should be taught in its place by school teachers. Many other improprieties in school discipline with remedies for each, were opportunely presented.

Recess of 5 minutes. Singing.

The Institute gave examples of Reading under the direction of Mr. Fowle. It was a trying scene, especially to the ladies. Each member was called upon to read the same lesson, commencing with the 9th verse of the 18th chapter of Luke.

It appears that the object of this lesson was simply to bring out the ability of teachers in this branch of education. After several had read this lesson, Mr Fowle read it, with a view to introduce his system of instruction.

Recess, but no singing. The ladies are anxious to sing more. What say, Mr Messer, shall they be disappointed?

Arithmetic, Mr. Fowle. The substance of this lesson was, each one's explanation of his manner of adding numbers. Notation and Numeration were again taken up. Several Teachers were called to the board, and then requested to illustrate how they would teach children these Rules. All this is important, but we must not be impatient. The subject will be resumed this afternoon.

Mr. Fowle will lecture Saturday evening.

G.

Our Country.

We live in a remarkable age, and in the great world of movements, our country takes a prominent position. Important discoveries have been made not only in science, but in many other departments of knowledge, by our countrymen. The recent discoveries and surveys of the Dead sea, of gold in California, and the methods of bringing it to light, and now the rich remains of the Aztecs of the 12th century, to which recent discoveries, we now wish to direct the attention of our readers.

A portion of the U S Topographical Engineers, with a sufficient military force, numbering in all, about four hundred men, during the last summer, made an expedition to the Navajoe country, where a favorable treaty was made with the Navajoe Indians, at the renowned canon of Chaillé, 279 miles from Santa Fe.

The remarkable discovery was made on the return march of the expedition, of a series of ruins in the canon of Chacco, which, doubtless, from the locality, appearance, and numbers, are the veritable remains of the Aztecs of the 12th century, the locality of which, on the authority of some of the maps, Humboldt has ascribed to the vicinage of the very spot where they were found.

Lieut. J. H. Simpson, in a letter to Col. Abert, Chief of the Topographical Engineers, which has been published in the Washington Intelligencer, thus describes them; and also, other matters of interest, to which we would direct the attention of the reader:

"These ruins are of an exceedingly interesting character, both on account of the mechanical skill and taste which they display, and of the undoubted evidence which they furnish of having been erected at a very remote period. The Indians of the present day know nothing of them, except that, according to tradition, they were inhabited by a people who came from the North; that Montezuma was the governor of this people; and that, after living here for a period, they dispersed—some eastwardly towards the Rio Grande, and others southwardly towards the city of Mexico.

Each pueblo is a single structure, covering, in some instances, as much as two acres in extent; discovering in places, by the still standing walls, four stories in height, and containing as many as three and four hundred rooms.—The main walls, plain surfaces throughout the whole extent, on the exterior, are very nearly three feet thick at base, and retreat on the inner side by a series of small jogs from bottom to top, and lessening the thickness gradually from the bottom upwards. The whole structure is built of a beautifully compact lamellar sandstone; the inner portion of this kind of stone and of clay mortar; and the outer portion faced with pieces of rectangular exactness, and so thin that three inches may be considered as their maximum thickness, and three quarters of an inch their least. The general appearance of the face of the building, at all the distance off, is that of a magnificent piece of mosaic work."

"Another object of interest, which the expedition has enabled us to see, was the far-famed canon of Chaillé, which has ever been regarded as the stronghold of the Navajoes on account of the immense depth and inaccessibility of its walls, and the impregnable fort which it was said to contain. The idea of the *existence* of the fort we are now enabled to explode; the security which it is capable of affording to the Navajoes, we find, has been overrated. but the depth and sublimity of the canon, so far from having been too greatly magnified, we are now free to acknowledge very much surpassed our expectations. This canon will be regarded as one of the prime objects of curiosity our country affords, and will ever command the attention of the geologist and tourist.

A third object of interest, which the expedition has brought to light, is the existence of a rock, of magnificent proportions, and of fair surface, upon which were found inscribed, in some instances, in *beautiful* and *deeply engraven* characters, the names of a number of persons of rank and of distinction, in connexion with the dates of their passing by the locality; and some other incidental allusions to occupation and history. One of these dates reaches back as far as 1606, and there are a number of others of this and the succeeding century. It is not at all improbable, that these inscriptions may be found of value in the suggestion or establishment of some point or points of history, and as such, are to be regarded with attention and interest. *Fac similes* of all these inscriptions I have had taken, as well as drawings made of every important object of natural curiosity, and plans and drawings made of all the principal ruins which have come under my observation.

A full map, giving all the positions of our several camps, latitudinally and longitudinally, the accidents of ground, the locality of the several objects of interest and curiosity, as well as a full report of the route, ruins, and inscriptions, to be illustrated by sketches taken on the spot, I hope to be able to furnish for the use of the Government, in the course of one or two months.

Another matter of interest, which has been evolved by the expedition, and which I have come near forgetting, but which probably stands foremost in point of value, is the belief that we have hit upon a middle route between the southern detour made by Col. Cooke from Santa Fe, and the northern one called the Spanish trail route, said to be equally long. It is very certain that, from Santa Fe to Zuni, a distance of near two hundred miles, and in an almost direct course to the city of the Angels, we traversed a well watered, wooded, and pastured route which, with very little labor, can be made an excellent wagon road. And our guide, Carravahal, informed me that from Zuni, a tributary of the Colorado, running generally a direct westwardly course to the Colorado, and which he has followed down to its mouth from Zuni to the Colorado, by way of the Rio Zuni, the road is equally practicable for wagons, and abounds in the necessary quantum of wood, grass, and water. If so, and the route can be as favorably extended from the Colorado westward to the Pacific, of which I have very little doubt, there is no question but that a wagon route has been obtained which cannot but shorten the distance to San Francisco at least from 3 to 400 miles, if not more.

Visit to Pico.

We copy the following from the journal already referred to in our columns, descriptive of the visit of a Bangorean to the Peak of Pico, an island mountain lying eight miles south of Fayal. This mountain is eight thousand feet high. From the shore to the top of the mountain is eighteen miles, but three fourths of the distance is not very abrupt. It is not until you approach within three or four miles of the summit that the mountain proper commences. It then shoots up in a conical form at angle of about 45 degrees, and in many places perpendicular:

"We engaged the services of a guide and started for the mountain, each shouldering his blanket and package. We made good head way till dark, when we had to feel our way over craggs and through ravines, now fetching up against the steep side of a rock, and now plunging into a deep gulley. In this way we went on eight or nine miles, when we pitched our tent, struck a fire with the brush, took a frugal supper, and lay down, wrapped in our blankets, about 11 o'clock at night. Two hours of sleep and we were up again and on our way. We had not gone far, when a dusky form peered through the mist. It was a Portuguese shepherd. He offered us water, and then wished us to hire him to go up the Peak with us, and as we ascertained that our guide was ignorant of the way, we hired him too. We begun to ascend the mountain about five o'clock; and for the first half mile got on tolerably well.—But as we climbed higher and higher, our legs and lungs began to fail us. The air was so attenuated that it could scarcely supply our lungs. I was astonished to find myself so soon exhausted. I could climb but a few rods at a time, when I had to lie flat on the ground till I could again get my breath. I soon began to tremble in every joint; then I became sick at the stomach, and finally faint. But never for a moment did I lose my determination to reach the top of the Peak. Often did I lie down completely exhausted and immediately fall asleep, but rousing the next minute I again pressed forward as far as I could. At last one of the guides came, and taking one of my hands, while I held a long staff in the other, he compelled me to keep on my feet and follow him. He told me I should never reach the top unless I kept going, but still I begged off several times until I could revive a little. The fellow grasped my hand with the power of a lion, now pulling me up a steep rock, and now lifting me over a huge opening, while he carried, slung over his shoulder, our provisions and water. I felt truly grateful to the fellow for his timely aid, and remunerated him for it when I left him; for without his assistance I know not when I should have reached the summit. As it was, however, I was the third one who gained it, and what a world was revealed to me! I stood one mile and a half above the ocean, which seemed to sleep at my feet. Four or five different islands were partly discernable and partly hidden by clouds, which lay a mile below, me, their upper surfaces being beautifully tinged with the morning rays of the sun. As I gazed upon them they grew denser, and rose towards the summit where I stood, but seemed incapable of attaining it. I stood in a serene and exhilerating atmosphere, and looked down into the very heart of the clouds as they rolled and tumbled together, and saw how showers are got up to order. My faintness and sickness left me the moment I reached the summit, and I felt a thousand times repaid for the toil and effort I had made to attain it. One glance from that dizzy hight is enough to pay for a voyage across the Atlantic.

On gaining the top of the mountain the crater suddenly opens at your feet, with a perpendicular wall of broken rock, 160 feet high, and extending half way round it. The rest of the way, the bottom of the crater, which is half a mile in diameter, and nearly level, runs out flush with the brow of the mountain, the sides of which have in many places split off, leaving perpendicular precipices more than a thousand feet deep, then passing down the mountains in immense slides or roads, even to its base. To stand on the verge of one of these and look down it, is like gazing into eternity.

A little at one side of the centre of the crater springs an abrupt peak four or five hundred feet high, nearly perpendicular on one side, and on the others so steep that we ascended it only by climbing from point to point of its jagged rocks. This is *The Peak of Pico*. It terminates in a single point not broad enough for half a dozen men to stand on, and this is surmounted by a heap of cobble stones which have been built up some four or five feet. We ascended this, one at a time, placing one foot upon the very apex. after we had increased its hight by a few additional stones, so as to say that we had been a little higher than any before us. Nearly at the summit of this peak is another little crater, some twenty feet deep and as many broad, from which issues a powerful steam of vapor, so hot that it immediately scalds the hand if placed in it where it first issues, but making a very agreeable vapor bath as it ascends and is slightly sulphurous to the smell. I found, not only at the top of the peak, but in several places at its base, fissures from which the steam forcibly issued, hot enough to boil eggs, and producing a roaring noise far down in the bowels of the mountain, proving that the volcano is still active internally, and only waits proper occasion to burst out in a rage.

After remaining some time on the Peak, and amusing ourselves by rolling down huge masses of rock, which leaped downward with fury till they were lost to the view, we began to descend, and soon passed into a dense cloud which completely hid every thing from us, so that we had to find our way down as best we could.

☞ The 4th of a series of doctrinal sermons will be delivered by Rev Mr Nye, at his church to-morrow afternoon. Subject.—Objections to Universalism considered.

Mr Nye will repeat, by request, to-morrow evening the 3d of the series. Topic.—Universalism defined. Services to commence at 1-4 to 7.

☞ It gives us great pleasure to receive and to publish the following gem of poetry from the author, Mr Colesworthy, a citizen of Portland, whose initials are as well known throughout the country as his full name.

This is the first contribution of his prolific pen to our columns and we prize it very highly.

The Suffering.

Come, let us feel for those
Who suffer and are sad;
To wipe their tears—to heal their woes—
Will make our spirits glad.

To pour within the breast
The words of peace and love,
Will make the darkest moment blest
With sunshine from above.

A penny, or a ear,
A word, a look, a sigh—
Such trifles to the heart are dear
When not a friend is nigh.

The favors we bestow
Where kindly feelings burn,
If e'er in life our lot is low,
Will bounteously return.

D. C. C.

C. P. FESSENDEN'S
WRITING ACADEMY, open day and evening, at No. 74 Main Street. Mr. FESSENDEN, thankful for the flattering patronage bestowed upon him (and having located himself permanently in this city, as a teacher of penmanship) would solicit a continuation of the patronage of all those who wish to acquire an easy, rapid and graceful system of writing, fitted for the counting room, or for ladies in epistolary correspondence. Those wishing to fit themselves to teach, will be fitted upon reasonable terms.
Cards marked to order with neatness and despatch.
Terms—for 12 Lessons,—Gentlemen $1,50. Ladies, $1,00. Payment in advance. 4m nov 2

DIED:

In this city, 16th inst., of Inflammation of the Brain, Albert Eliphalet, son of G. W. and Adrianna M. Merrill, aged 2 years.

WHIG AND COURIER.

LATER FROM EUROPE.

ARRIVAL OF THE STEAMSHIP

AMERICA

AT HALIFAX.

The America arrived at Halifax on Thursday morning at 7 o'clock.

COMMERCIAL SUMMARY.

Commercial advices from all parts of England continue of a favorable character.

There has been a fair demand in the Liverpool market for Cotton throughout the week, both from the trade and on speculation, but holders have been more free and sellers have conceded one eighth per pound on common American and Brazil, whilst other kinds remain without any material alteration.

The transactions in Flour and Corn at all the principal markets have been very limited during the week, and prices generally are a turn lower than at the sailing of the Cambria.

Western canal flour is quoted at 22s to 24s. Philadelphia and Baltimore at 22s 6d a 24s.—Sales are effected at very irregular prices, and quotations are merely nominal.

Indian corn is quoted at 27s a 29s for white, and 27s a 28s for yellow, from which holders are unwilling to yield.

The iron market presents the usual inactivity of the season, without any material change in price.

In American provisions there has been a quiet, but steady business going forward at full prices.

Sugar. All descriptions of sugar have had a lively demand, and an impression prevails will rule higher.

In the manufacturing districts only a moderate business has been going forward. The reports are generally favorable and prices are steady.

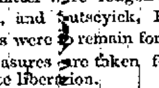
AUSTRIA AND HUNGARY.

The fiends who are nicknamed Rulers in Austria, not satisfied with the human gore they have shed, still continue their sanguinary career. Several additional murders have been added to the already fearful list. Their victims who have been strangled in Pesth, or shot, are all men of mark and when it is stated that the wretch Haynaw has been appointed civil and military Gov. of Hungary, crimes at which humanity shudders, at once arises before the mind at the mention of his name. If this wholesale system is continued another crisis in that country is believed to be inevitable. The Hungarian officials are sending in their resignations in masses.

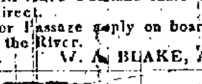
A circular of Kossuth's is circulated in Pesth in which the Patriot assures his countrymen that he has removed the Crown.

Measures have been taken by the Porte for the location of the Polish and Hungarian refugees. The former had been conveyed to Shumla, while the latter were lodged in good quarters at Silislegr, and Kutscyick, Kossuth and the other leaders were to remain for a while at Widdin, until measures are taken for their removal and ultimate liberation.

No less than 300 of the Hungarian refugees had become converts to Islamism, and many of their friends are about to follow their example.

STEAMER
GOVERNOR.


WILL leave Bangor on MONDAY, the 26th inst., at 6 o'clock, A. M., for the last time this season. Will leave Portland same Evening for New York direct.
For Freight or Passage apply on board, or to either Agent on the River.
Nov. 17, 1849. W. A. BLAKE, Agent.



DIVIDEND.
BY a vote of the Directors of the PENOBSCOT STEAM NAVIGATION COMPANY, at a meeting on the 15th inst., I am directed to pay a dividend of Twenty dollars on each share of Stock in said Company, to be paid on and after the 1st of December next.
W. A. BLAKE, Treasurer,
Bangor, Nov. 17, 1849.
Persons having bills against the P. S. N. C. are requested to present them for settlement.
W. A. BLAKE, Agent.

REMOVAL.
C. R. SMITH,
DEALER IN FASHIONABLE
Ready Made Clothing,
HAS removed from his former place of business on East Market Square, to the well known and desirable stand recently occupied by Mr. J. H. HUNT, where he will be happy to receive the calls of his friends, and where he has a large and handsome stock of
Ready Made Clothing,
Suited to the present and approaching season, that men in all the pursuits of life may readily accommodate themselves with GARMENTS suited to their tastes and their wants.
SPECIAL ATTENTION
Is requested to the Stock of
Fall and Winter Clothing,
And to the Stock of Cloths from which Garments may be made to order at the shortest notice. Here may be found every article in the Clothing line.
OVERCOATS,
Heavy Blue, Mixed, and Drab Beaver. Super Brown Black and Fancy Cloths. Flushing and other Coatings.
Dress Coats, Sacks, &c.,
Of every desirable quality and Style.
PANTALOONS.
Every variety of Fancy Bucksk ns, Cassimeres, Satinets, and heavy Fabricks.
VESTS.
All kinds, from the richest Satin, Silk and Velvet to the more substantial and cheaper kinds.
Furnishing Goods.
A very handsome assortment of all goods required for an entire outfit of a gentleman's wardrobe.
It is quite unnecessary to enumerate the articles, but it is sufficient to say that the Stock is large, well selected, and will be sold at
Uncommonly Low Prices,
In order to keep business lively, and have the community comfortably and elegantly clad.

GREAT COUGH REMEDY!

CHERRY PECTORAL

For the Cure of
COUGHS, COLDS, HOARSENESS, BRONCHITIS, CROUP, ASTHMA, WHOOPING-COUGH AND CONSUMPTION.

THIS truly wonderful Remedy for all the diseases of the Lungs and Throat has become the chief relief in the affections to which they are subject, and the most powerful remedial agent in the cure of pulmonary complaints that has ever been known to the world, and the public respect their opinions

PROF CRAVELAND of Bowdoin College, Maine Writes—"I have with a full confidence of your Cherry Pectoral in my own family and that of my friends, and have not the least doubt that it is the best compound of medicine I have ever known has proved so eminently successful in relieving diseases of that sort and to give"

REV DR OSGOOD
Writes—"That his daughter after having obliged to keep the room for nine months, with a severe settled cough accompanied by raising of much blood, terminating in the extreme symptoms of Consumption was induced by the use of his Cherry Pectoral and has completely recovered I also that he considers Cherry Pectoral the best remedy for pulmonary complaints ever given to the public"

DIRECT EVIDENCE

Springfield Mass 27 1849
Dr Ayer Dear Sir—For two years preceding the month of November, 1847, I had been confined very low with a very severe Cough, accompanied by raising of blood and profuse night sweats by the advice of my attending physicians I was induced to use your Cherry Pectoral, and continued to do so till I found myself entirely restored, and am free to attest to your preparation

Another Life Saved.

Read the following letter from a Clergyman of Camden Me to the Editor of the Gospel Banner—

DOWN'S ELIXIR A CURE.

BR DREW—I am anxious to do good to my fellow beings, and have no more and dipper until I write to tell you, through the Banner what in my sick ness last winter and spring I received very great benefit from the use of N H DOWN'S ELIXIR

I had been troubl I some weeks with a severe cold which so affected the vocal organs, that it was with great difficulty I could preach on the Sabbath. My cough was continued until I was completely prostrated by bleeding which created a deep hard cough My appetite failed my strength wasted, and my friends despaired. Seeing Wistar's Balsam of Wild Cherry recommended in the Banner I procured a bottle and commenced taking it and continued its use until I had taken those bottles When I became satisfied that it contained opium, (which I never can use in any form if necessary) and also containing the very agents that should be relaxed I used other bottles of patent medicines but with no good effect. Even week I continued gradually to sink and was in the expectation of what time I was extremely low weak my skin dry an hunky and my feet and hands chill most of the time I had a dull, heavy pain between my shoulders and a distressing pain in the pit of my stomach, which would be relieved with a full glass of water and for five weeks every night and scarcely a night free from difficulty of breathing and low spirits My stomach at this time was so weak that it was with difficulty I could retain a little food. In this situation when I commenced the use of N H DOWN'S ELIXIR—And to my great joy and the great joy of my family I soon found that the use of it a few days had regulated my bowels equalized the circulation of the blood through my skin upon the skin. I used three bottles in two weeks which entirely removed the soreness and weakness from my stomach gave me a good appetite, and gradually restored my strength. I continued using six weeks, used six bottles which time I was able to resume my business as a preacher which I have recommended to a large number and have never known it to fail of doing good where the directions were followed

I have given at to my children in colds and in a case of measles and it has proved as it is recommended to be

I therefore *cheerfully recommend* N H DOWN'S VEGETABLE BALSAM ELIXIR to all who are afflicted with any of the diseases for which it is recommended Yours truly J. L. TUTTLE

Camden August 1849

Facts deduced from the foregoing letter

1st Down's Elixir is laxative—cures by restoring the secretions while other medicines in cases that difficulty

2d It is perspirant It equalizes the circulation—restores a healthy moisture to the skin, and vigor and tone to the system

3d It removes soreness and weakness from the stomach—gives a good appetite and restores strength to the system

4th It cures colds—is an effectual remedy for the measles and proves FALSE IT IS RECOMMENDED TO BE"

It is sold by Druggists and dealers in medicine throughout the country, and I wholesale and retail by the proprietor at prices by DAVID BUGBEE G. W. LADD, CURTIS & PERKINS A. P. GUILD WILLIAMS & McFARLAND Bangor, I. S. Smith J. W. Curtis & Co Campden Chas Johnson J. B. Chick, Frankfort H. F. Enfield Buckspoint, J. Hooper, Jr. S. P. Hatch & Co Castine, B. Dr. TOWNSEND'S
COMPOUND EXTRACT OF
SARSAPARILLA,
Wonder and Blessing of the Age
THE MOST EXTRAORDINARY MEDICINE IN THE WORLD

Directions put up in Quart Bottles—it is six times the Strength of Syrup Sarsaparilla and a superior to any cold Extract vending surpassing, sickening or debilitating the Patient

SPRING AND SUMMER MEDICINE

It is not only purifies the whole system and makes the person but it *creates new pure blood* when poisoned by no other medicine And the grand secret of its wonderful success—

Is owned within the last five years more than *three hundred thousand cases* of severe and obstinate diseases of which

were considered incurable

More than 5,000 children during the two past seasons

10 000 *CASES OF GENERAL DEBILITY AND WANT OF NERVOUS ENERGY*

Dr Townsend's Sarsaparilla invigorates the whole system permanently Those who have lost their regular energy by the effect of medicine or in business committed in youth, or the excessive indulgence of the passions and living on a general physical prostration of the nervous system insanities, want of ambition, fainting spells, premature decay and decline hasten now to find that fatal disease, Consumption, can be entirely restored by this pleasant remedy This Sarsaparilla is far superior to any

INVIGORATING CORDIAL,

As it renews and invigorates the system gives activity to the limbs and strength to the muscular system, in a most extraordinary degree.

CONSUMPTION CURED

Cleanses and Strengthens Consumption can be cured Bronchitis Consumption, Liver Complaint, Colds, Catarrah, Coughs, Asthma, Spitting of Blood, Soreness in the Chest, Hectic Flush, Night Sweats, Difficult or profuse expectoration Pain in the Side, &c Have been and can be cured

SPITTING BLOOD!

New York, April 28, 1847

DR TOWNSEND—I write to believe that your Sarsaparilla has been the means through Providence, of saving my life I have for several years had a bad cough it became worse and worse At last I raised large quantities of blood, had night sweats, and was greatly debilitated and reduced and did not expect to live I have only used your Sarsaparilla a short time, and there I am a wonderful change been wrought in me I am now able to walk all over the city I raise no blood, and my cough has left me You can well imagine that I am thankful for these results

Your obedient servant,
WM. RUSSELL, 65 Catherine st

RHEUMATISM

This is only one of more than four thousand cases of Rheumatism that Dr Townsend's Sarsaparilla has cured The most severe and chronic cases are weekly eradicated by its extraordinary virtues

James Cummings, Esq one of the assistants in the Lunatic Asylum, Blackwell's Island, lost a gentleman spoken of in the following letter

Blackwell's Island, Sept 14, 1847

Dr Townsend—Dear Sir I have suffered terribly for nine years with the Rheumatism, considerable of the time I could not eat, sleep or walk I had the most distressing pains, and my limbs were terribly swollen I have used four bottles of your Sarsaparilla, and they have done me more than one hundred dollars worth of good I am much better—indeed, I am entirely relieved You are at liberty to use this for the benefit of the afflicted Yours, respectfully,
JAMES CUMMINGS

FITS! FITS! FITS!

Dr Townsend not having wasted his Sarsaparilla in cases of Fits, of course never recommended it, and was surprised to receive the following from a gentleman and respectable Farmer in Westchester County

Fordham, August 13, 1847

Dr Townsend—Dear Sir I have a little girl, seven years of age who has been several years afflicted with Fits we tried almost every thing for her, but without success and has, lately, been so much fitted on, (in addition to your circulars for cases like hers, we thought, as she was in very delicate health, we would give her some of your Sarsaparilla, and are very glad we did, for it not only restored her strength but she has had no return of the disease since I would take great pleasure and advantage in recommending your Sarsaparilla for all other purposes given it a fine trial and find it a favorite with every one

Yours respectfully
JOHN BUTLER, *Jr.*

FEMALE MEDICINE

Dr Townsend's Sarsaparilla is a sovereign and speedy cure for Incipient Consumption, Barrenness, Prolapsus Uteri or Falling of the Womb, Costiveness, Piles, Leucorrhœa or Whites, obstructed or difficult Menstruation, Incontinence or Retention of Urine or involuntary discharge thereof and for the general prostration of the system—no matter what be the result of inherent cause or causes, just as by irregularity illness, or accident it may have been brought on Nothing can be more surprising that its invigorating effects on the human frame Persons all weakness and Debility, from taking it at once a renewed sense and full energy are instantly felt Its use is immediately followed by the relievedness of the fearful malady to which it the great cause of Barrenness—It will not be expected of us, as cases of no doubt or nature to exhibit certificates of cures performed but we can assure the afflicted that hundreds of cases have been reported to us Thousands of consumptive families have been without children of a age owing to the use of invaluable medicine, have been blessed with fine, healthy offspring

TO MOTHERS AND MARRIED LADIES.

The proprietors of Sarsaparilla has been so extensively prepared it not once to female complaints No female who has reason to suppose she is approaching that critical period *That turn of life*, should neglect to take it as it is a certain preventative for any of the numerous and horrible diseases to which females are subject at this time of life This period *may be delayed for several years by using this medicine* Nor is it less valued in for those who are approaching womanhood as it is calculated to rectify nature by quickening the blood and invigorating the system Indeed this medicine is invaluable for all the delicate diseases to which women are subject

It braces the whole system, renews permanently the natural energies—by removing the humors from the blood, and my cough has left me You can well imagine that I am thankful for these results

Your obedient servant,
WM. RUSSELL, 65 Catherine st

YOUNG CHILDREN

Dr Townsend Dear Sir—I have the pleasure to inform you that one of my children have been cured of a bad by the use of your excellent medicine and have very freely with friends and neighbors have also given it to my children with the best effects which were all cured in a very few days and have driven the disease entirely away for which you have my sincere gratitude Yours respectfully,

ISAAC W. CRAIN 106 Wooster st

OPINIONS OF PHYSICIANS

The almost daily receiving orders from different parts of the Union

Physicians in the immediate vicinity that we, the undersigned, Physicians of Albany have in numerous cases prescribed Townsend's Sarsaparilla and believe it the best valuable preparations of the Sarsaparilla of the day

NEW AND
Important Discovery.

GRAY HAIR can be restored to its original color with the Auburn Brown or Black Sandy Light or Red Hair can be matched with any darker shade, surpassing in beauty even the most natural locks, retaining the gloss and softness of the original Hair, by using O. M. Ballard's

Permanent Liquid Hair Dye,

Of one preparation, which is entirely different from all other preparations of Hair Dye now before the public It free from all injurious properties, which can be tested by taking a lock of the fines and most delicate Hair of an infant, and color it with the Dye, when it will not impair its gloss or its texture in the slightest degree, which is the best evidence which can be given that it is not an injurious O the contrary, it improves the looks of the Hair, promotes its growth, and prevents it from falling out and unlike other preparations, after the Hair is colored and dry, will not crock, fade, or wash out

In short, from its peculiar delicacy, efficacy, and easy application it is worthy the attention of all who may wish to improve the color of the Hair as it will make any shade, from a white to a jet black, It is now free to an unaccountable extent, by persons who have prematurely turned gray, and others whose Hair is of no desirable color which they restore or exchange for a beautiful Auburn Brown or Black, without any additional preparation or the slightest trouble

To FEMALES who suffer from a Morbid and Unnatural Condition, and who seem threatened with CONSUMPTION, this is a Medicine of Inestimable Value It is an *Excellent Remedy* a SUMMER COMPLAINTS, and a *Great Preventive* of FEVERS

Dr Stephen Jewett's highly Celebrated Pulmonary Elixir.

This Elixir contains many of the most highly approved cough or expectorant medicines, recommended by the United States, London and Edinburgh Colleges of Health; but being peculiarly and fortunately combined as truly wonderful as their good results *Particularly should it's Mixture be on every Family where there are* CHILDREN, as the delay incident to procuring a Physician has often proved fatal to those whom *timely assistance would have SAVED*

This Elixir will prove itself to exceed any thing as a sure remedy in

Consumption of the Lungs, Coughs, Colds, Sore Throat, Influenza, Asthma, Bronchitis, Quinsy, Croup, Whooping Cough, Difficulty of Breathing, Pains in the Side or the Breast, Soreness of the Chest, Distress when lying upon the side, producing Choking, or sense of Suffocation, &c, &c

Dr Stephen Jewett's Justly Celebrated Strengthening Plaster.

This Plaster is composed of quite a number of vegetable substances, peculiarly compounded—There never has been, and there is not at the present time, a better plaster made for the various purposes for which plasters are used It HAS NO SUPERIOR for removing

Pain, Internal Inflammations,

Rheumatism, Gout, Swollen or Weak Joints, Limbs or Cords Lameness Cramp Pains or Weakness in the Side Back or Breast, Weak Stomach, &c &c, and

WHEN USED IN

LIVER AND PULMONARY DISEASES,

will prove very beneficial to those suffering with such complaints

DR CHRISTIE'S GALVANIC BELTS BRACELETS, NECKLACES, AND MAGNETIC FLUID.

For the Removal and Permanent Cure of all

NERVOUS DISEASES,

And of those Complaints which render life an Impaired weakened or unhealthy condition

NERVOUS SYSTEM.

This beautiful and convenient application of the mysterious powers of GALVANISM and MAGNETISM has been pronounced by the Medical Faculty both in Europe and the United States to be the *most valuable discovery of the present age*

Dr. CHRISTIE'S GALVANIC BELT AND MAGNETIC FLUID,

is used with the most perfect and unfailing success in all cases of

GENERAL DEBILITY,

Strengthening the weakened and giving new life and vigor to the whole system

FITS, CRAMP, PARALYSIS AND PALSY,

Dyspepsia or Indigestion,

RHEUMATISM, Acute and Chronic,

GOUT, DROPSY, TIC DOLOREAUX,

DEAFNESS NERVOUS HEADACHE,

MORBID PALPITATION OF THE HEART, APOPLEXY, NEURALGIA, PAIN in the SIDE and CHEST,

Liver Complaint,

SPINAL COMPLAINT, and CURVATURE of the SPINE, HIP COMPLAINT, DISEASES of the KIDNEYS, DEFICIENCY OF NERVOUS AND PHYSICAL ENERGY,

and all

Nervous Diseases,

which are produced from one simple cause namely

A Derangement of the Nervous System

as the NERVOUS COMPLAINTS they are and the medicine cures by restoring to the nerves their natural energies of tone and vigor thereby removing the influence of disease and restoring the afflicted to perfect health and happiness

Dr Christie's Galvanic Curatives,

effects the first time they are worn and cure by a few days application in the following manner Nature links her closely under the skin that a slight irritation of the surface produces a powerful effect upon the nerves and the Galvanic Fluid being applied to the skin of the patient in a few minutes produces a sensation of warmth which soon becomes a beautiful and pleasant glow which after a few days application will be perceptible to the most casual observer and in a few weeks the patient will be thoroughly restored to health

The Galvanic Belt and Magnetic Fluid are used with perfect safety by the most delicate female and in connection with the Bracelets and Necklaces will be found sufficient to cure the most inveterate case of Nervous Disorder In ordinary cases the Belt and Fluid are taken which by their action on the nerves and muscles of the stomach afford temporary relief but which leaves the patient in a lower state than before the injured faculties, after the action has ceased Not so with the Galvanic Bracelets and Necklaces which by their continued use restore the nerves to their natural tone and vigor and thence back again to the fountain of life keeping up a continuous Galvanic circulation through out the system Thus the most severe cases of DYSPEPSIA are PERMANENTLY CURED A NEW DAWN IS OFTEN AMPLY SUFFERED AND ERADICATE THE DISEASE OF YEARS

Certificates and Testimonials

From the most Respectable Sources.

Could be given sufficient to fill every column in this paper We make a few selections The first is an

EXTRAORDINARY CASE

and conclusively proves that

"Truth is stranger than Fiction."

The following letter narrating one of the most remarkable events in the annals of Medical Science is from the

Rev. Dr. Landis, a Clergyman

of New Jersey of distinguished attainments and talented reputation—

SIDNEY, New Jersey July 12 1848

DR A H CHRISTIE—Dear Sir You ask to know of me what has been the result of my use of the galvanic apparatus for the cure of Rheumatism with which I was afflicted and as the public has a right to know the benefits of any discovery which may be made for the alleviation of human suffering I will cheerfully comply with your request

For about twenty years I had been afflicted with Rheumatism in my right arm, and for the last seven years my sufferings from this cause were very great and almost incessant. I had applied to many physicians and had taken a great deal of medicine but without obtaining permanent relief from any source I had concluded that I must carry the disease with me to the grave. About *seven years* since in consequence of frequent exposure to the weather while preaching in the open air, I became subject to a severe pain in the right shoulder which flew to my arm and hand rendering them entirely helpless. In the course of a few days the pain would leave the arm and hand and attack the head, producing the most excruciating pain in the right temple, eye, and ear, and rendering me totally blind and deaf in the right eye and ear. In this way the disease would alternate from the head to the arm and back again, sometimes remaining in the head for a week or ten days at a time, and then in the arm for the same length of time. During the whole of this period I was confined to my bed, and was unable to help myself in the slightest degree. My sufferings were indescribable, and I had given up all hope of ever being restored to health. In this condition I remained until March 1847 when I was induced by the solicitations of my friends to call on Dr Christie, who was then in Philadelphia, and who had just introduced his Galvanic Apparatus to the public. I was carried to his office, and after a few days application of the Galvanic Fluid, I was able to walk home unassisted. I continued to call on the Doctor for a few days longer, when I was entirely relieved from pain, and restored to perfect health. I have had no return of the disease since, and have not the slightest fear of it. I have recommended the Galvanic Apparatus to many persons who were afflicted with Rheumatism, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Deafness, and in many cases it has restored the hearing entirely. I have also recommended it to persons afflicted with Dyspepsia, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Liver Complaint, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Debility, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Headache, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Irritability, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Prostration, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Weakness, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Irritability, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Prostration, and in every instance it has proved a perfect cure. I have also recommended it to persons afflicted with Nervous Weakness, and in every instance it has proved a perfect cure.

Over 60,000 Persons

have used the Galvanic Belt and Magnetic Fluid which are now a large number of whom are entirely subject to Nervous Disorder

ENTIRELY AND PERMANENTLY CURED

without a single case of relief having been attempted in vain which were a large number of whom are entirely subject to Nervous Disorder

To illustrate the use of the GALVANIC BELT suppose the case of a person afflicted with Dyspepsia or Indigestion Dyspepsia is simply caused by a want of tone in the stomach and muscles of the stomach which leave the patient in a lower state than before
